

**Unlock the full
omnichannel potential
of your Shopify store**
with the OneStock-Shopify connector

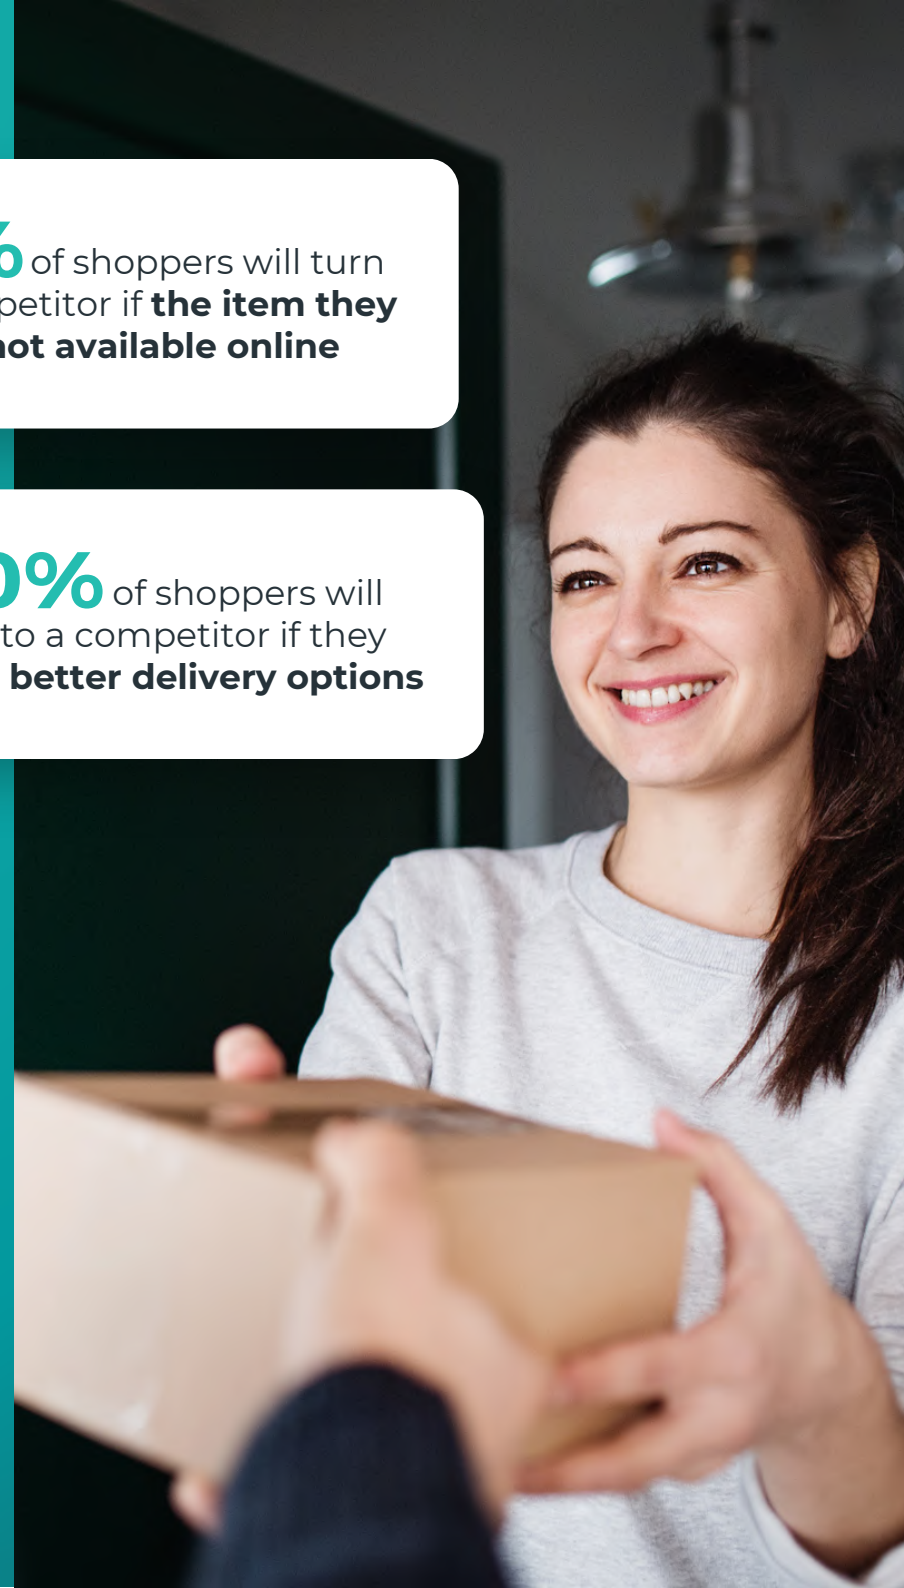

Your customers expect more from their shopping experiences: more product choice, more delivery options, more transparency.

But creating this customer experience requires complete visibility of the products, stock, orders and fulfillment capabilities across your entire distribution network.

This is where OneStock's Distributed Order Management System (OMS) helps you achieve e-commerce excellence.

69% of shoppers will turn to a competitor if **the item they want is not available online**

60% of shoppers will turn to a competitor if they have **better delivery options**

Combine Shopify with OneStock for advanced order management capabilities in less than half the integration time.

Built for Shopify, the OneStock OMS connector maintains the highest quality standards to ensure seamless integration and an optimal user experience.

Streamline OMS integration

Tried and tested by major Shopify customers, OneStock's technology represents an agile, best-of-breed approach to the fast-changing and highly competitive world of e-commerce.

Accelerate return on investment

The connector is free to use and halves the integration efforts required to add OneStock's order management capabilities and additional omnichannel services to your Shopify platform.

Combine Shopify with OneStock for ultimate omnichannel efficiency and an unparalleled customer experience.

OneStock is the Distributed Order Management System leading brands use to grow their sales, delight their customers and optimise their performance.

Enhance the frontend user experience

Ensure in-stock products are always available for purchase with a competitive delivery promise and reliable order tracking to maximise sales opportunities and meet customer expectations.

Optimise your backend operations

Give head office and retail teams the tools they need to intelligently process orders, enhance efficiency, minimise costs, optimise inventory management and meet business objectives.

Meet customer expectations ● Streamline shopping journeys ● Maximise profit margins ● Improve operational efficiency

Reduce out-of-stocks online with near real-time inventory visibility

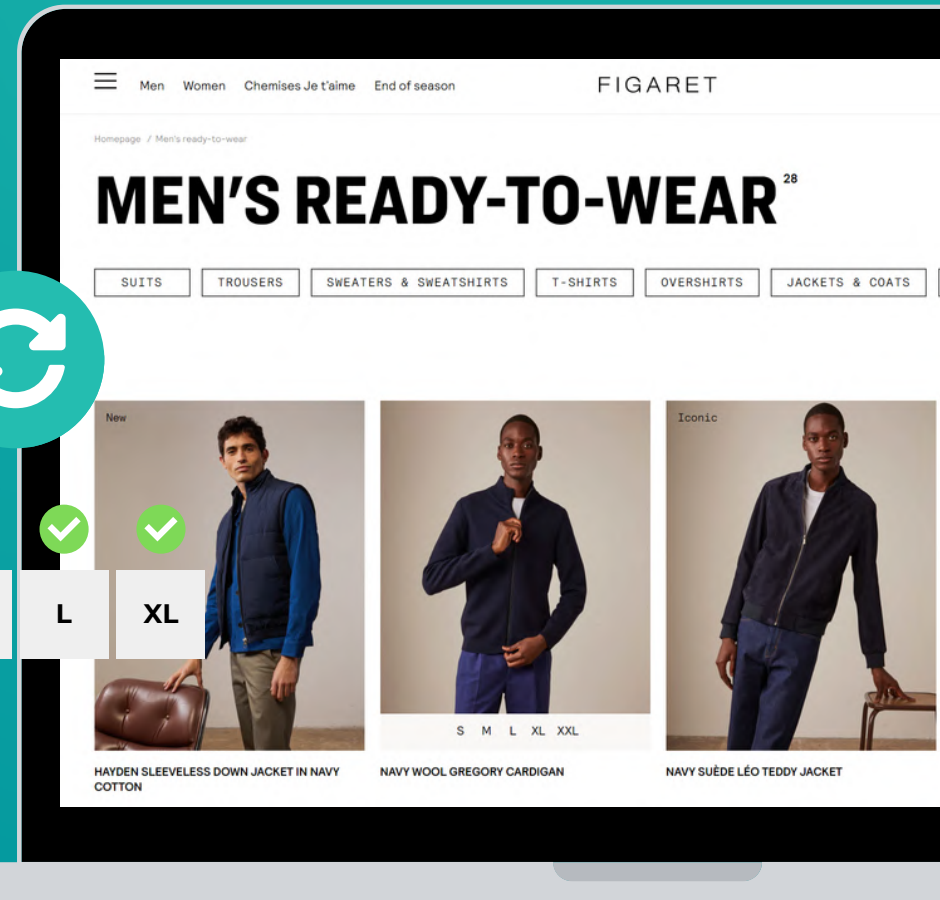

Import and synchronise product, inventory and order information from all stock locations in OneStock OMS to create a unified stock.

Give customers access to an enriched product catalogue with a complete and reliable view of in-stock items.

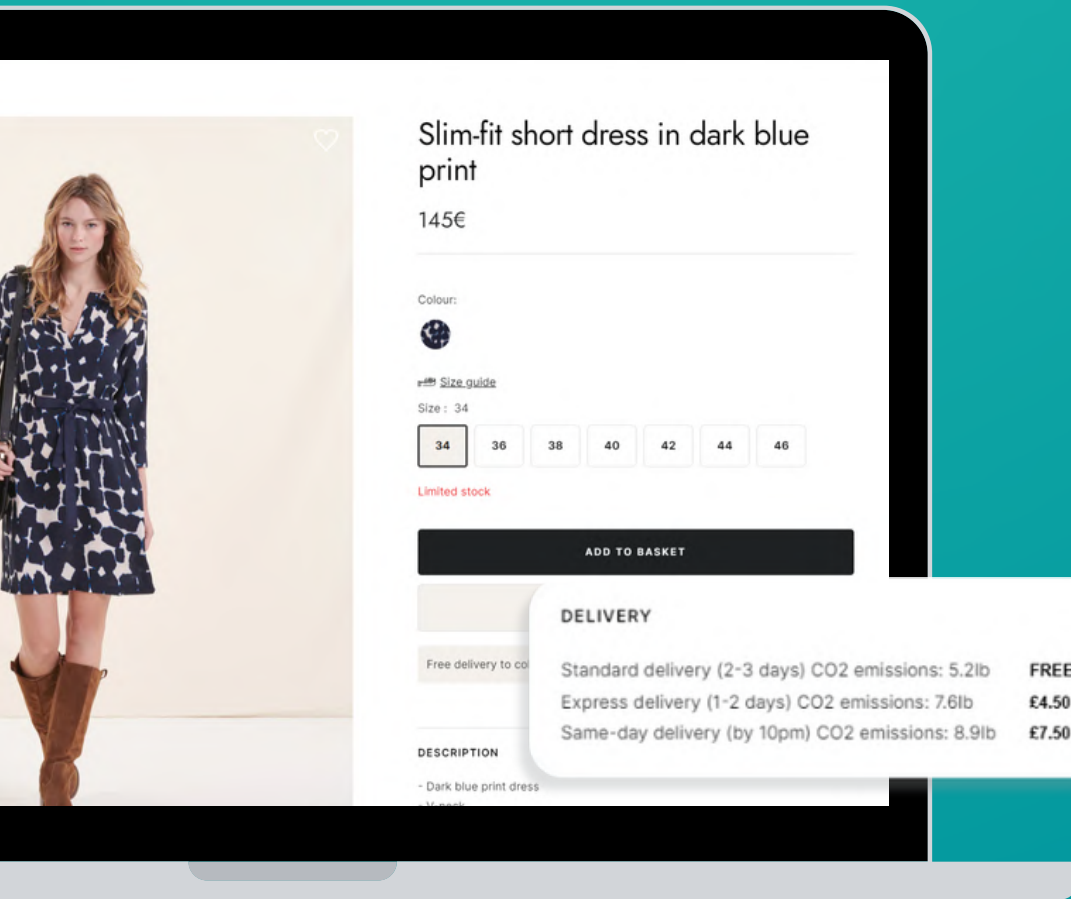

Increase sales opportunities online and accelerate stock turnover across your entire distribution network.

Optimise product pages with accurate stock levels & fulfilment options

Dynamically display stock and delivery information on each product page based on real-time inventory levels, locations, movements and fulfilment capabilities on OneStock OMS.

Give your customers all the information they need to make informed purchase decisions – before they get to checkout.

Reduce browse abandonment and increase add-to-cart rate with a clear customer promise.

Convert more sales with a complete & competitive delivery promise

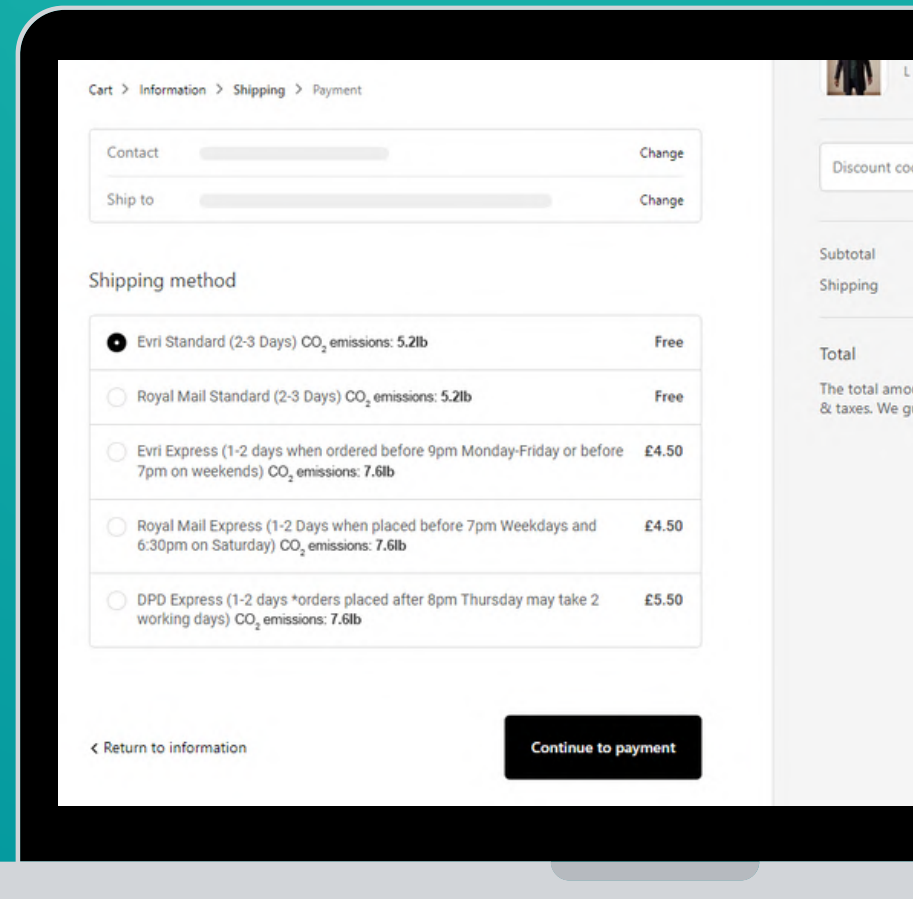

Provide all available fulfilment options based on cart contents, with the ability to display detailed information on carriers, costs, delivery times, order cut-offs, expected number of parcels and carbon emissions.

Set expectations prior to purchase with post-purchase communications allowing customers to track their orders.

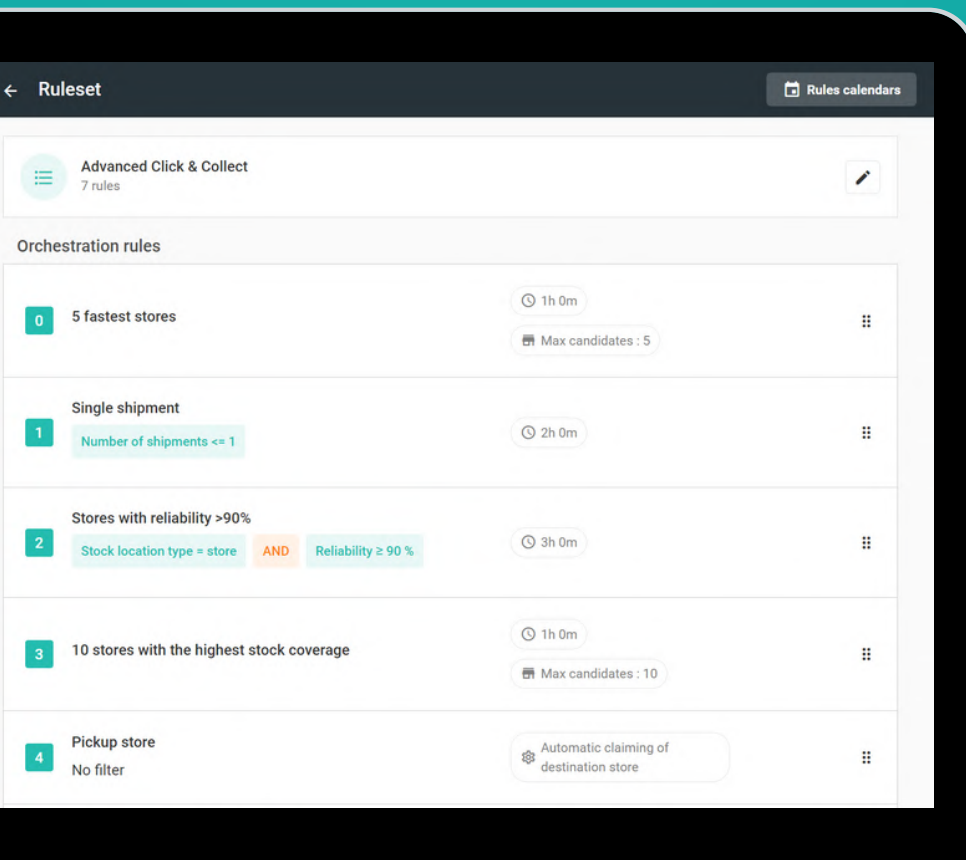

Encourage low-cost and low-emission fulfilment options to help meet financial and sustainability objectives.

Improve operational efficiency across the entire order lifecycle

Create ultimate operational efficiency in your supply chain with highly customisable order orchestration rules, gamified store processes and advanced analytics tools.

Set your business up to exceed customer expectations with intelligent order orchestration and automated workflows.

Reduce order cancellations with alerts and proactive customer communications when order orchestration requires manual intervention or a delivery promise is reset.

Meet your business objectives for profitability, sustainability, customer experience and more.

Why choose OneStock?

OneStock OMS is trusted by over 70 brands, comes recommended by Gartner and has passed the rigorous tech checks of the MACH Alliance.

Built to grow with your brand

Our scalable, flexible architecture allows for rapid deployment, easy integration, future-proof adaptability and best-in-class experiences.

Enhanced omnichannel capabilities

Continually improve the customer journey with new services like Reserve & Collect and in-store appointments, available through our Store App.

Designed for non-technical users

The OneStock interface is highly customisable to fit your processes and is designed to be used by business and retail teams with no coding or IT support necessary.

OneStock's connector stands out as a great solution, optimising the time-to-value for mid-market and enterprise retailers as they embark on their transformative omnichannel journey. This integration not only streamlines operations for retailers, but also enhances the shopping experience for their customers – providing faster and more efficient order fulfilment.
